FYI..... I checked and if you can access L drive remotely you'll see the data. It includes a couple of Cabot reports with analytical and a DEP powerpoint with over 200 slides graphing trends, etc. No evidence on quick look of any DEP data since Dec 2010 and that data is graphed no actual analytical reports. Some haz substances were analyzed by Cabot.

Should we talk about whether its practical to get this data reviewed under the proposed timeframes. Thanks, den.

Dennis and Wayne, you'll be getting invitations to the Environmental Science Connector, so you'll have access to the Dimock data that way. additionally, you can find the same stuff on the L drive.
